Luck Rewards Draw Participation Rules

General Information

1. Full participation conditions and rules are published on the Company's website and other local domains.
2. The Luck Rewards draw system is entertainment-based and serves as an additional trading reward mechanism.
3. Users earn draw currency—Stars—through trading activity and other platform actions, then can use Stars to purchase tickets in available draws.
4. Stars are used only within the platform and are not monetary funds, deposits, or financial instruments.
5. Stars are exchanged for unique numbers to participate in draws at the specified prices.
6. Each draw has its own start date for ticket sales and result publication.
7. Prizes are credited to the user's account or sent to the Market section depending on the reward type.
8. Prize pool funding is provided solely by the Company's funds.
9. The Company reserves the right to restrict access to certain draws for specific countries, regions, user groups, or segments.

Participation Terms

1. Registered platform users with access to a specific draw can participate in draws.
2. Some draws may be available only to a specific selection of clients.
3. To participate in a draw, you must successfully purchase at least one unique number in exchange for Stars. Stars are deducted at the time of ticket purchase.
4. Clients can purchase unlimited tickets provided they have sufficient Stars.
5. Purchased tickets are non-refundable after purchase, except in cases of technical error or draw cancellation.
6. Unique numbers are selected randomly at the end of the draw.
7. The number of draws a user can participate in simultaneously is unlimited.
8. Users can view their unique numbers in the My Tickets section.

Tickets, Luck Rating, and Refunds

1. At the time of ticket purchase, the system records the current Luck rating.
2. If a user's Luck rating changes after purchase, already purchased tickets remain unchanged.
3. User trading activity (trading turnover, trade frequency, and volume) forms the Luck rating, which in turn affects the chance of refunding the unique number's cost.
4. Refunds are issued only for tickets that did not win any prize.
5. Upon successful refund, the user receives the full refund of the number's cost in Stars.

Prizes and Rolling Prize

1. The number of prizes per user cannot be limited; the number of rewards equals the number of winning unique numbers.
2. One ticket can win only one prize.
3. Prizes are credited to the user's account or sent to the Market section depending on the reward type.
4. Delivery of physical or special prizes may require additional processing by the Company.
5. Rolling Prize is a special cumulative prize that can be won with a certain probability. If the Rolling Prize is not won, it carries over to the next applicable draw.
6. The Rolling Prize amount is displayed on the draw page and can increase when carried over from previous draws.
7. If the Rolling Prize is won, its amount resets to the starting value.
8. Rolling Prize can be won by only one winning unique number, unless otherwise specified in the specific draw's terms.
9. One draw can contain one or multiple Rolling Prizes.
10. Rolling Prizes are displayed separately and are not included in the regular draw prize pool.
11. Rolling Prize winnings are fixed in USD and credited to the active trading account with conversion to the account's currency.

Results Publication

1. Upon completion of the draw, a list of winning tickets is published on its page (results display winning tickets without disclosing user personal information).
2. Seven days after completion, the draw moves to the Draw History section.
3. The draw is considered complete after all prizes are credited.
4. Prize crediting occurs simultaneously with results publication.
5. If there is a violation of platform trading rules, use of multiple accounts, detection of technical manipulation, or other abuse, the Company reserves the right to cancel a user's participation in the draw and/or void the prize.
6. If a user's account is blocked, restricted, or inactive at the time of results publication, prize distribution may be suspended or canceled.
7. Only winning unique numbers are published in the draw results without disclosing user personal information.
